

GT-1[®] Max Motor Oil with LiquiTek[™]

Kendall[®] GT-1 Max Motor Oil with LiquiTek is a premium quality, full-synthetic automotive engine oil designed to provide excellent engine protection for both turbocharged gasoline direct injection, conventional gasoline-fueled and flex-fueled passenger cars and light trucks under all operating conditions. It is particularly recommended for vehicles operating at extreme temperatures or under severe driving conditions, such as towing heavy loads.

GT-1 Max Motor Oil with LiquiTek is formulated with synthetic base stocks and an exclusive performance additive package. The full-synthetic formulation, compared with conventional engine oils, provides improved protection against viscosity breakdown and deposit formation at high temperatures; lower volatility for reduced oil consumption; and faster oil circulation at low temperatures for easier starting and better protection during cold starts. Our LiquiTek additive package provides increased engine protection by providing increased engine cleanliness and reduced wear. Reduced friction also helps improve fuel economy performance beyond ILSAC GF-6 requirements.

GT-1 Max Motor Oil with LiquiTek exceeds new car warranty requirements as defined by ILSAC GF-6. It is uniquely formulated to help combat low speed pre-ignition (LSPI) in turbocharged gasoline direct injection engines. GT-1 Max Motor Oil with LiquiTek meets or exceeds "Resource Conserving" requirements for fuel economy improvement, emission system and turbocharger protection, and protection of engines operating on ethanol-containing fuels up to E85. It is backward serviceable for use where API SN or earlier "S" category engine oils are recommended.

Applications

- Turbocharged gasoline direct-injection, conventional gasoline-fueled and flex-fuel passenger cars, light trucks and sport utility vehicles, including gasoline-electric hybrids, especially when operating under severe conditions
